HECK YEA, IT'S CCLAB!

A note about homework repositories:

All of your homework should be in one repository and the link to that repository should be the link you submitted to me on the form.

Some of you haven't submitted the link yet.
Your homework is incomplete until you do.

http://bit.ly/ZctvlB

Get your homework up and running.

Today’s slides are available in the repo.

(CCLabClassCode > Git Pull)

Arduino OUTPUTS

OUTPUTS

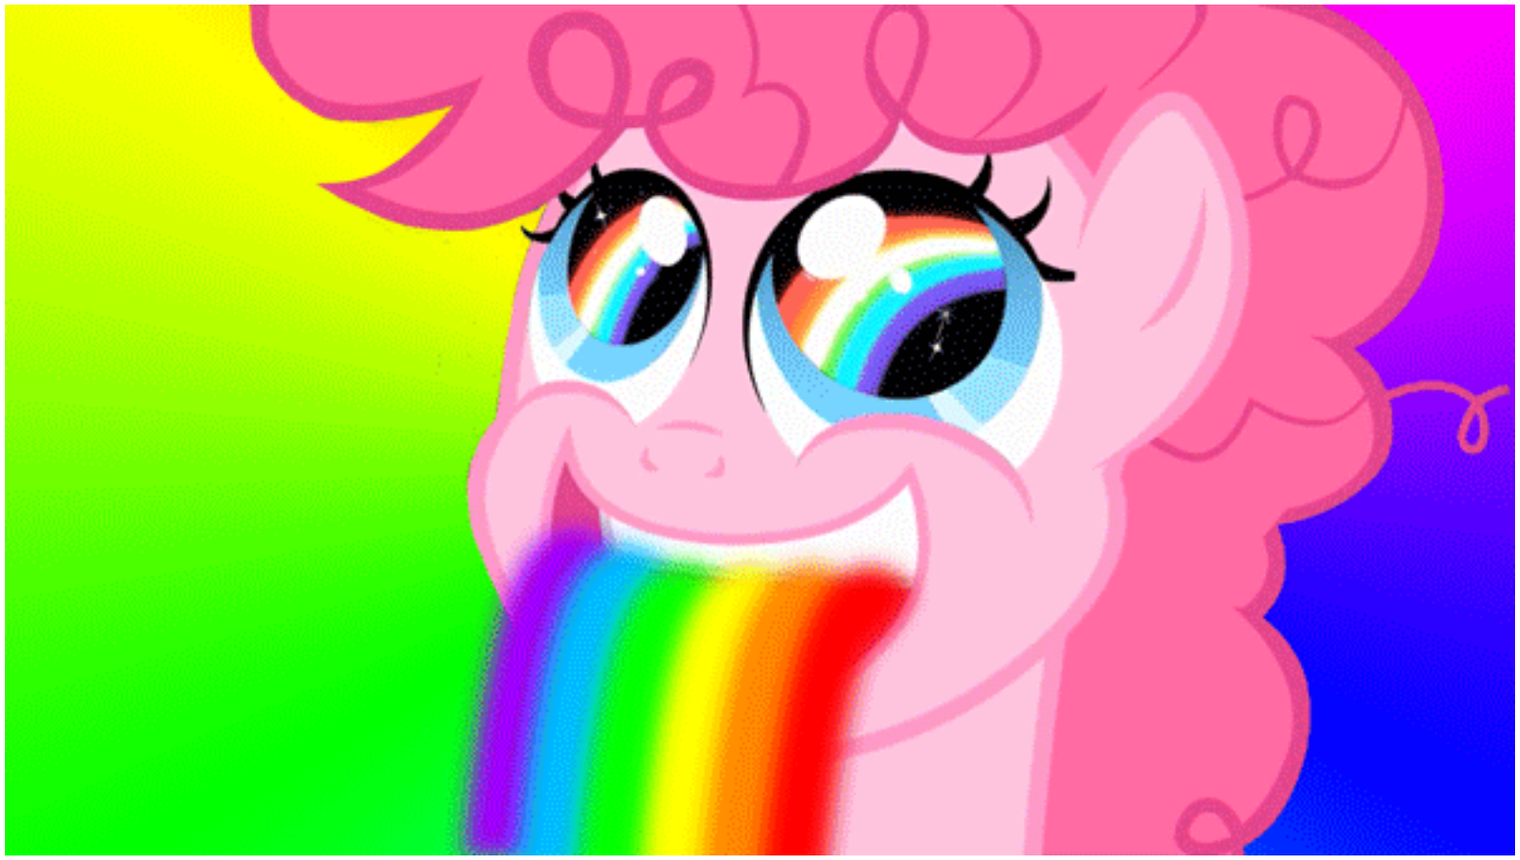
Open up the SIK Circuit03 code.

(FILE > SIK Guide Code > Circuit03)

So, what's going on?

Upload it!

RGB LEDS



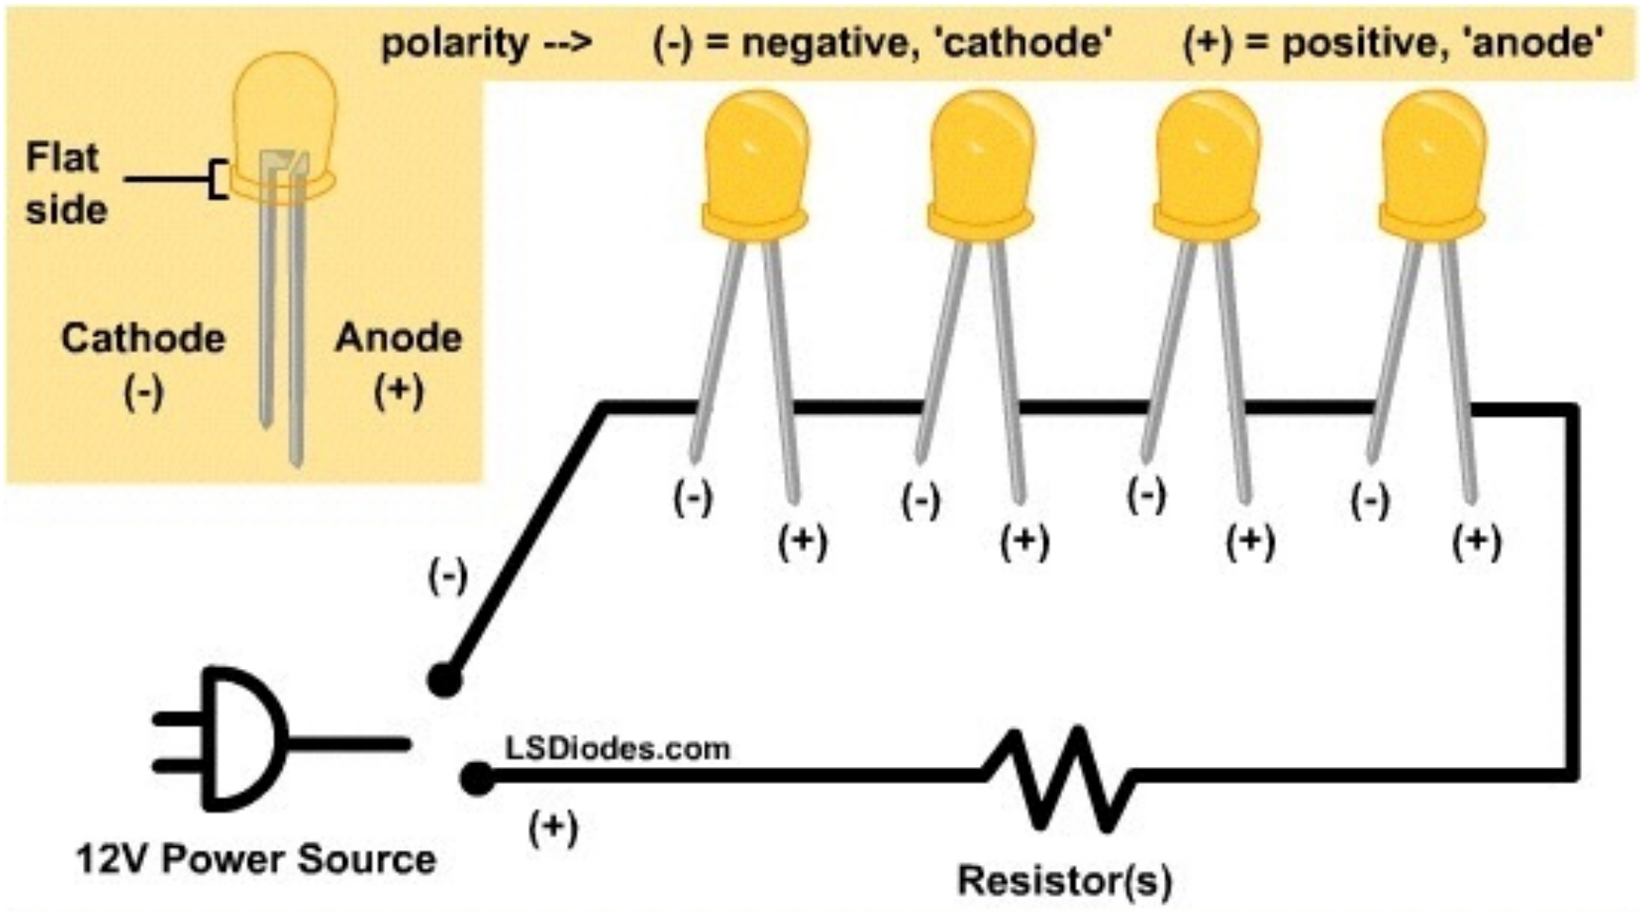
LEDS++

A few ways to do it.

LEDS++

single input: SERIES CIRCUIT

LEDS++

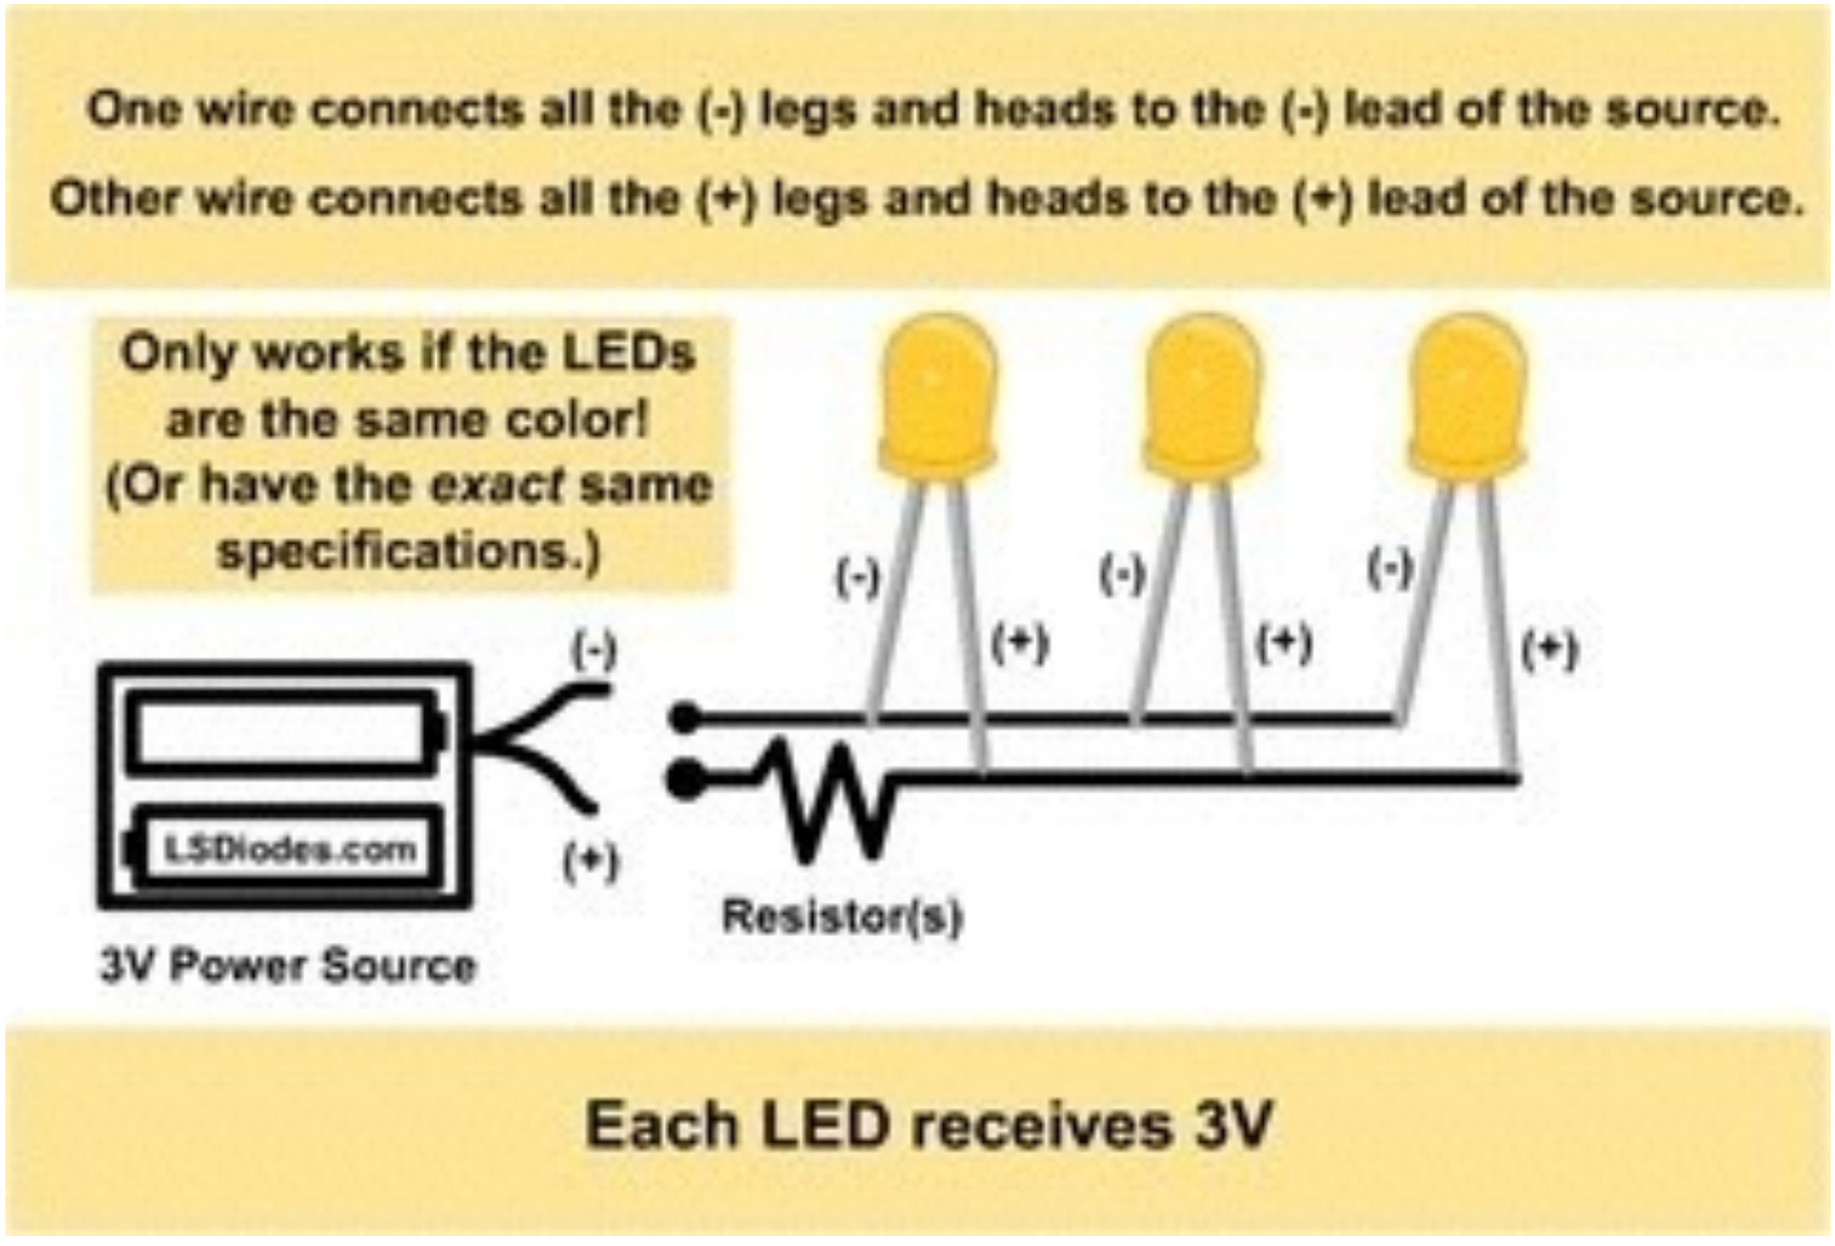


$$\frac{\text{Volts}}{\text{LEDs}} = \frac{12}{4} = 3\text{V going through each LED}$$

LEDS++

single input:
PARALLEL CIRCUIT

LEDS++



One wire connects all the (-) legs and heads to the (-) lead of the source.
Other wire connects all the (+) legs and heads to the (+) lead of the source.
Only works if the LEDs are the same color! (Or have the exact same specifications.)

```
int timer = 100;           // The higher the number, the slower the timing.
int ledPins[] = {
  2, 7, 4, 6, 5, 3 };       // an array of pin numbers to which LEDs are attached
int pinCount = 6;           // the number of pins (i.e. the length of the array)

void setup() {
  // the array elements are numbered from 0 to (pinCount - 1).
  // use a for loop to initialize each pin as an output:
  for (int thisPin = 0; thisPin < pinCount; thisPin++)  {
    pinMode(ledPins[thisPin], OUTPUT);
  }
}

void loop() {
  // loop from the lowest pin to the highest:
  for (int thisPin = 0; thisPin < pinCount; thisPin++) {
    // turn the pin on:
    digitalWrite(ledPins[thisPin], HIGH);
    delay(timer);
    // turn the pin off:
    digitalWrite(ledPins[thisPin], LOW);

  }

  // loop from the highest pin to the lowest:
  for (int thisPin = pinCount - 1; thisPin >= 0; thisPin--) {
    // turn the pin on:
    digitalWrite(ledPins[thisPin], HIGH);
    delay(timer);
    // turn the pin off:
    digitalWrite(ledPins[thisPin], LOW);
  }
}
```

Here's your Homework

Your Arduino Final Project due in two weeks.

(yup: Arduino's over.)

(assignment coming soon)

Next class: Work session + Individual Meetings

ALSO....

Next Tuesday is
Ada Lovelace Day.

you should check out:

The Forgotten Female Programmers Who Created Modern Tech

http://www.npr.org/blogs/alltechconsidered/2014/10/06/345799830/the-forgotten-female-programmers-who-created-modern-tech

Brownie points to anyone who brings something Lady-Tech or Ada themed to class next week.

(it's my favorite nerd holiday)
