LEDS + INPUTS

LEDS + INPUTS

Open up the Analog
Read Serial sketch.

(FILE > EXAMPLES > BASICS > Analog Read Serial)

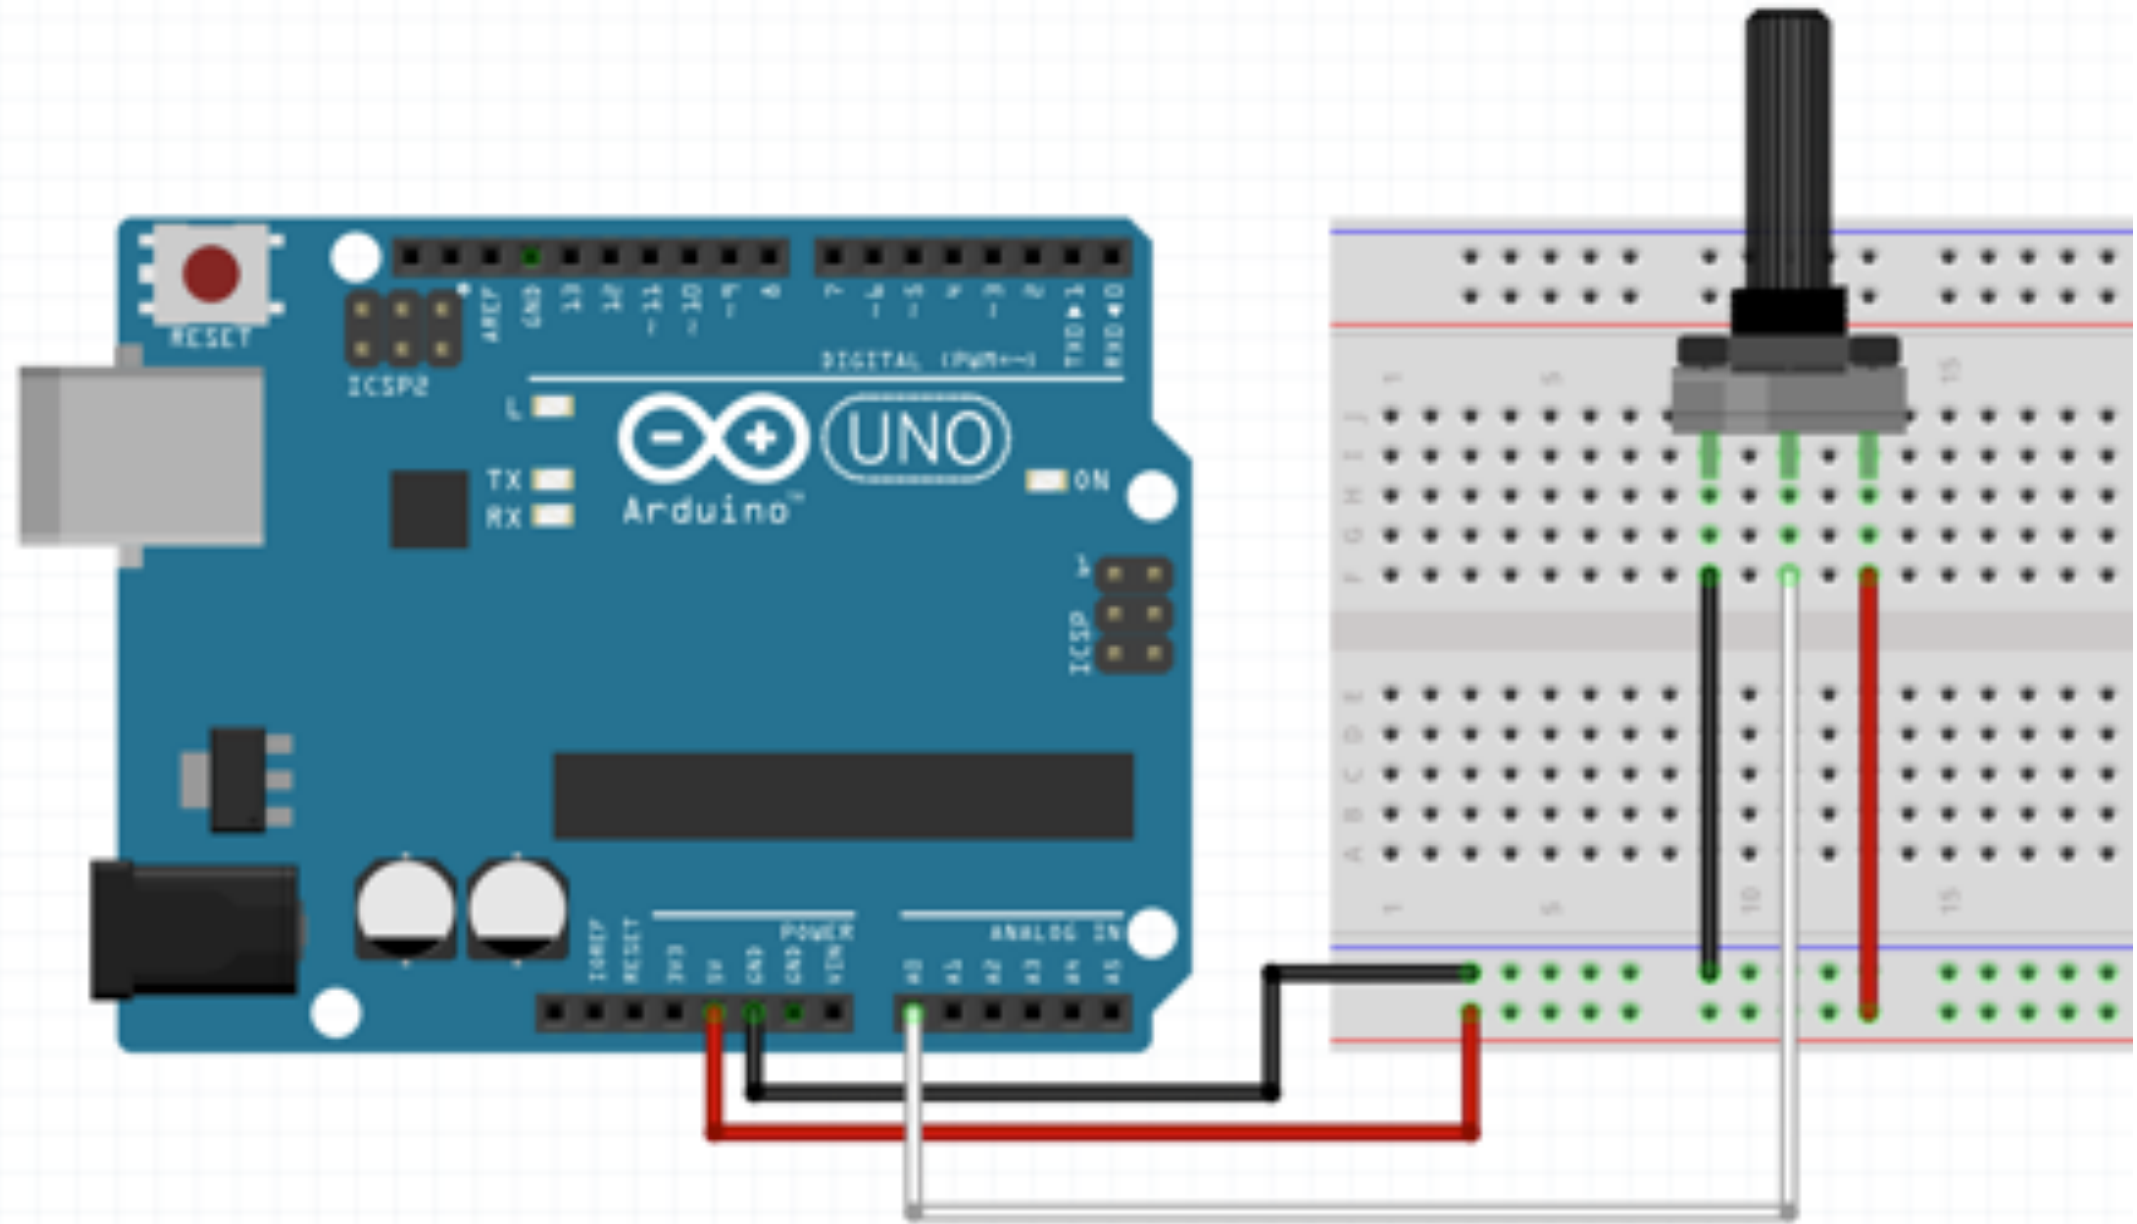

LEDS + INPUTS

```
void setup() {  
  // initialize serial communication at 9600 bits per second:  
  Serial.begin(9600);  
}  
  
// the loop routine runs over and over again forever:  
void loop() {  
  // read the input on analog pin 0:  
  int sensorValue = analogRead(A0);  
  // print out the value you read:  
  Serial.println(sensorValue);  
  delay(1);          // delay in between reads for stability  
}
```

LEDS + INPUTS

```
void setup() {  
  // initialize serial communication at 9600 bits per second:  
  Serial.begin(9600);  
}  
  
// the loop routine runs over and over again forever:  
void loop() {  
  // read the input on analog pin 0:  
  int sensorValue = analogRead(A0);  
  // print out the value you read:  
  Serial.println(sensorValue);  
  delay(1);          // delay in between reads for stability  
}
```

LEDS + INPUTS

LEDS + INPUTS

```
/*
  AnalogReadSerial
  Reads an analog input on pin 0, prints the result to the serial monitor
  Attach the center pin of a potentiometer to pin A0, and the outside
  pins to ground and +5V.

  This example code is in the public domain.
  */

// the setup routine runs once when you press reset:
void setup() {
  // initialize serial communication at 9600 bits per second:
  Serial.begin(9600);
}

// the loop routine runs over and over again forever:
void loop() {
  // read the input on analog pin 0:
  int sensorValue = analogRead(A0);
  // print out the value you read:
  Serial.println(sensorValue);
  delay(1);        // delay in between reads for stability
}
```

LEDS + INPUTS

LEDS + INPUTS

I thought it was gonna be food, It's just...words

LEDS + INPUTS

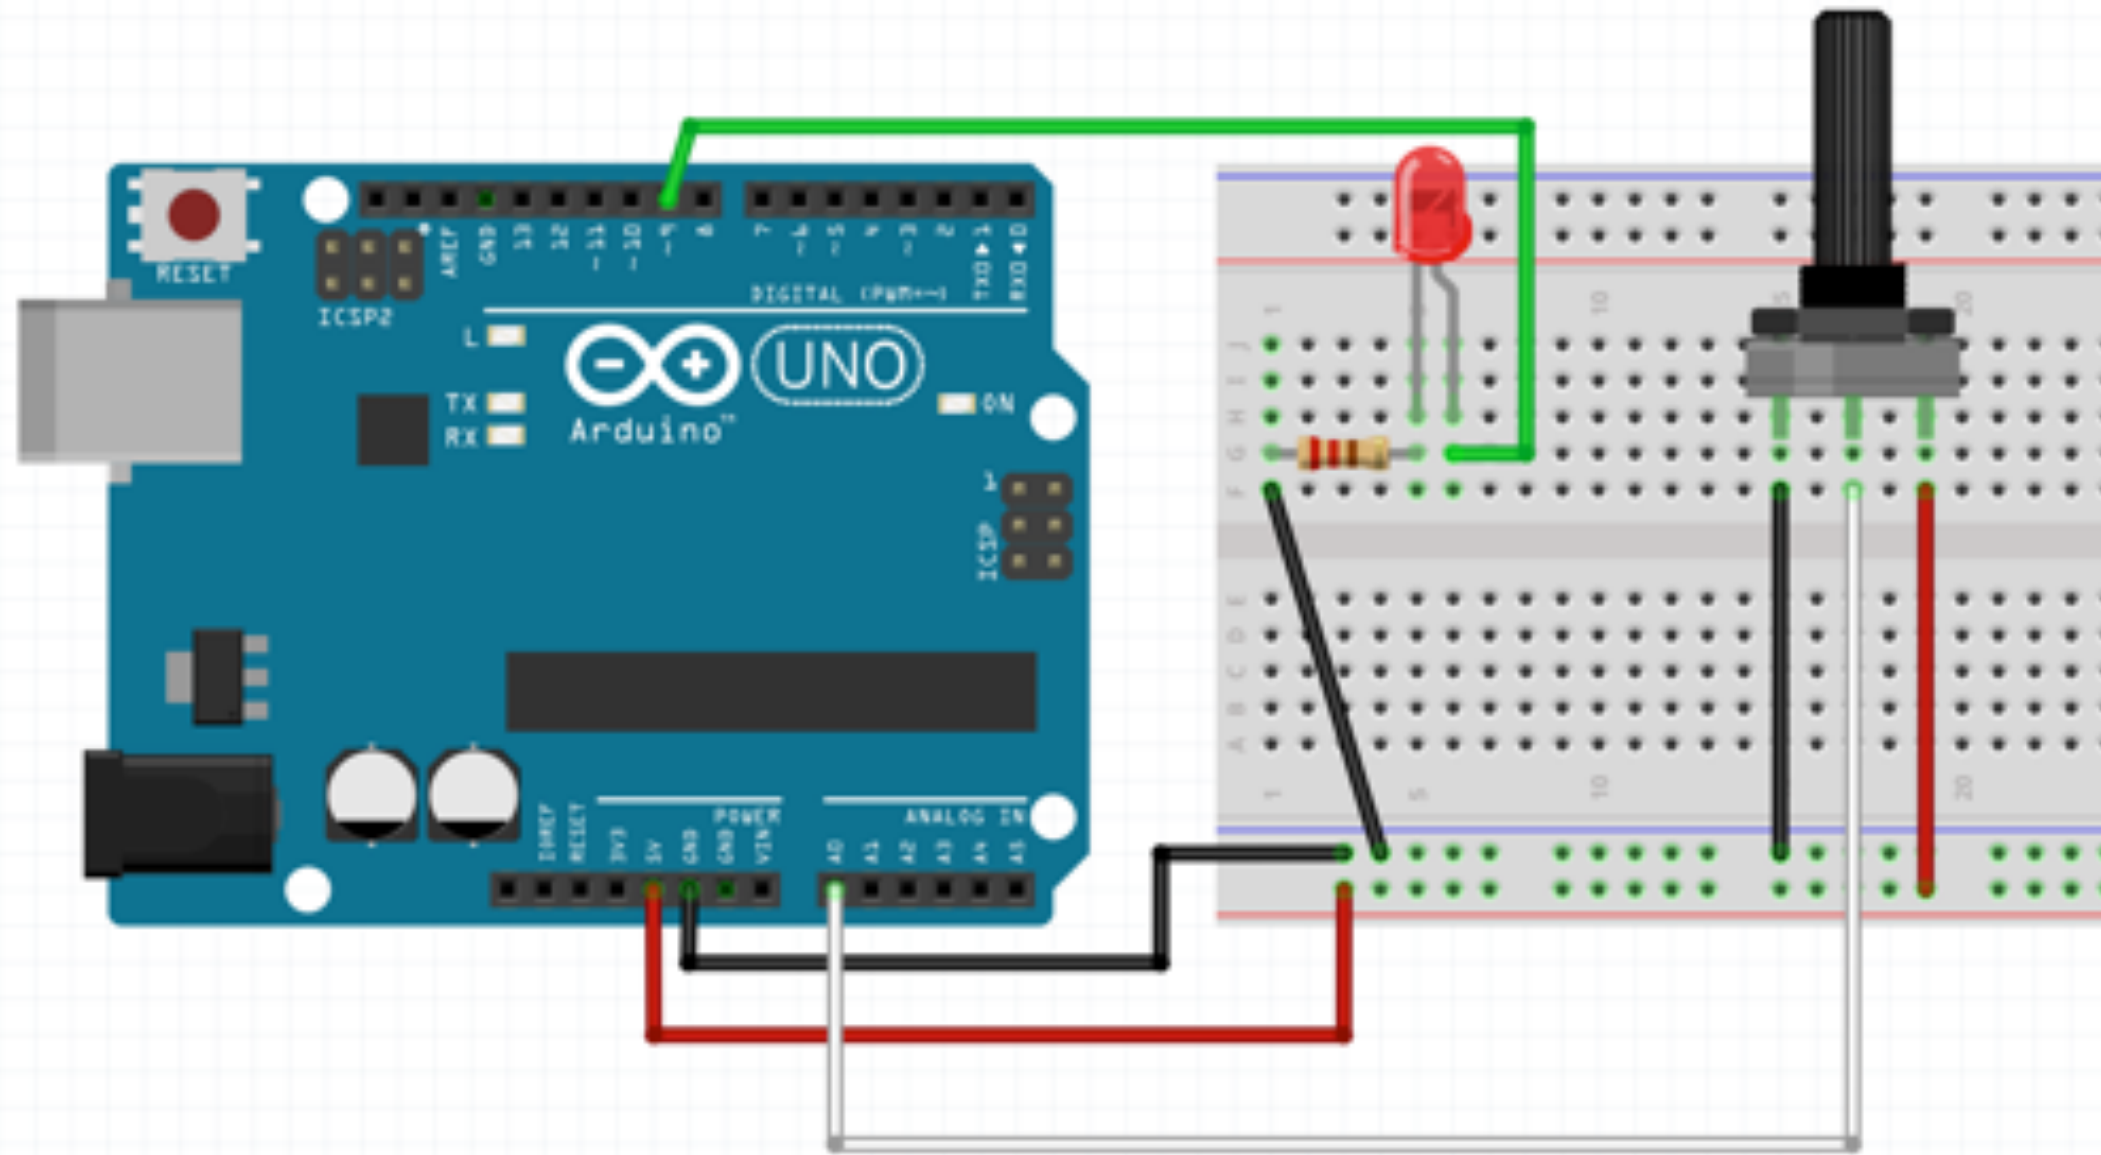

LEDS + INPUTS

```
//use pin 9 because it can write analog values  
int ledPin = 9;
```

```
void setup() {  
  // initialize serial communication at 9600 bits per second:  
  Serial.begin(9600);  
  //set up the pin as an output  
  pinMode(ledPin, OUTPUT);  
}
```

```
// the loop routine runs over and over again forever:  
void loop() {  
  // read the input on analog pin 0:  
  int sensorValue = analogRead(A0);  
  // print out the value you read:  
  Serial.println(sensorValue);  
  analogWrite(ledPin, 255);  
  delay(1); // delay in between reads for stability  
}
```

LEDS + INPUTS

LEDS + INPUTS

RUN IT!

LEDS + INPUTS

LEDS + INPUTS

```
int ledPin = 9;
int brightness = 0;

void setup() {
  // initialize serial communication at 9600 bits per second:
  Serial.begin(9600);
  //set up the pin as an output
  pinMode(ledPin, OUTPUT);
}

// the loop routine runs over and over again forever:
void loop() {
  // read the input on analog pin 0:
  int sensorValue = analogRead(A0);
  // print out the value you read:
  Serial.println(sensorValue);
  //make the value of the brightness be between 0 and 255
  brightness = map(sensorValue, 0, 1024, 0, 255);
  //set your pin brightness to the brightness value
  analogWrite(ledPin, brightness);
  delay(1);          // delay in between reads for stability
}
```

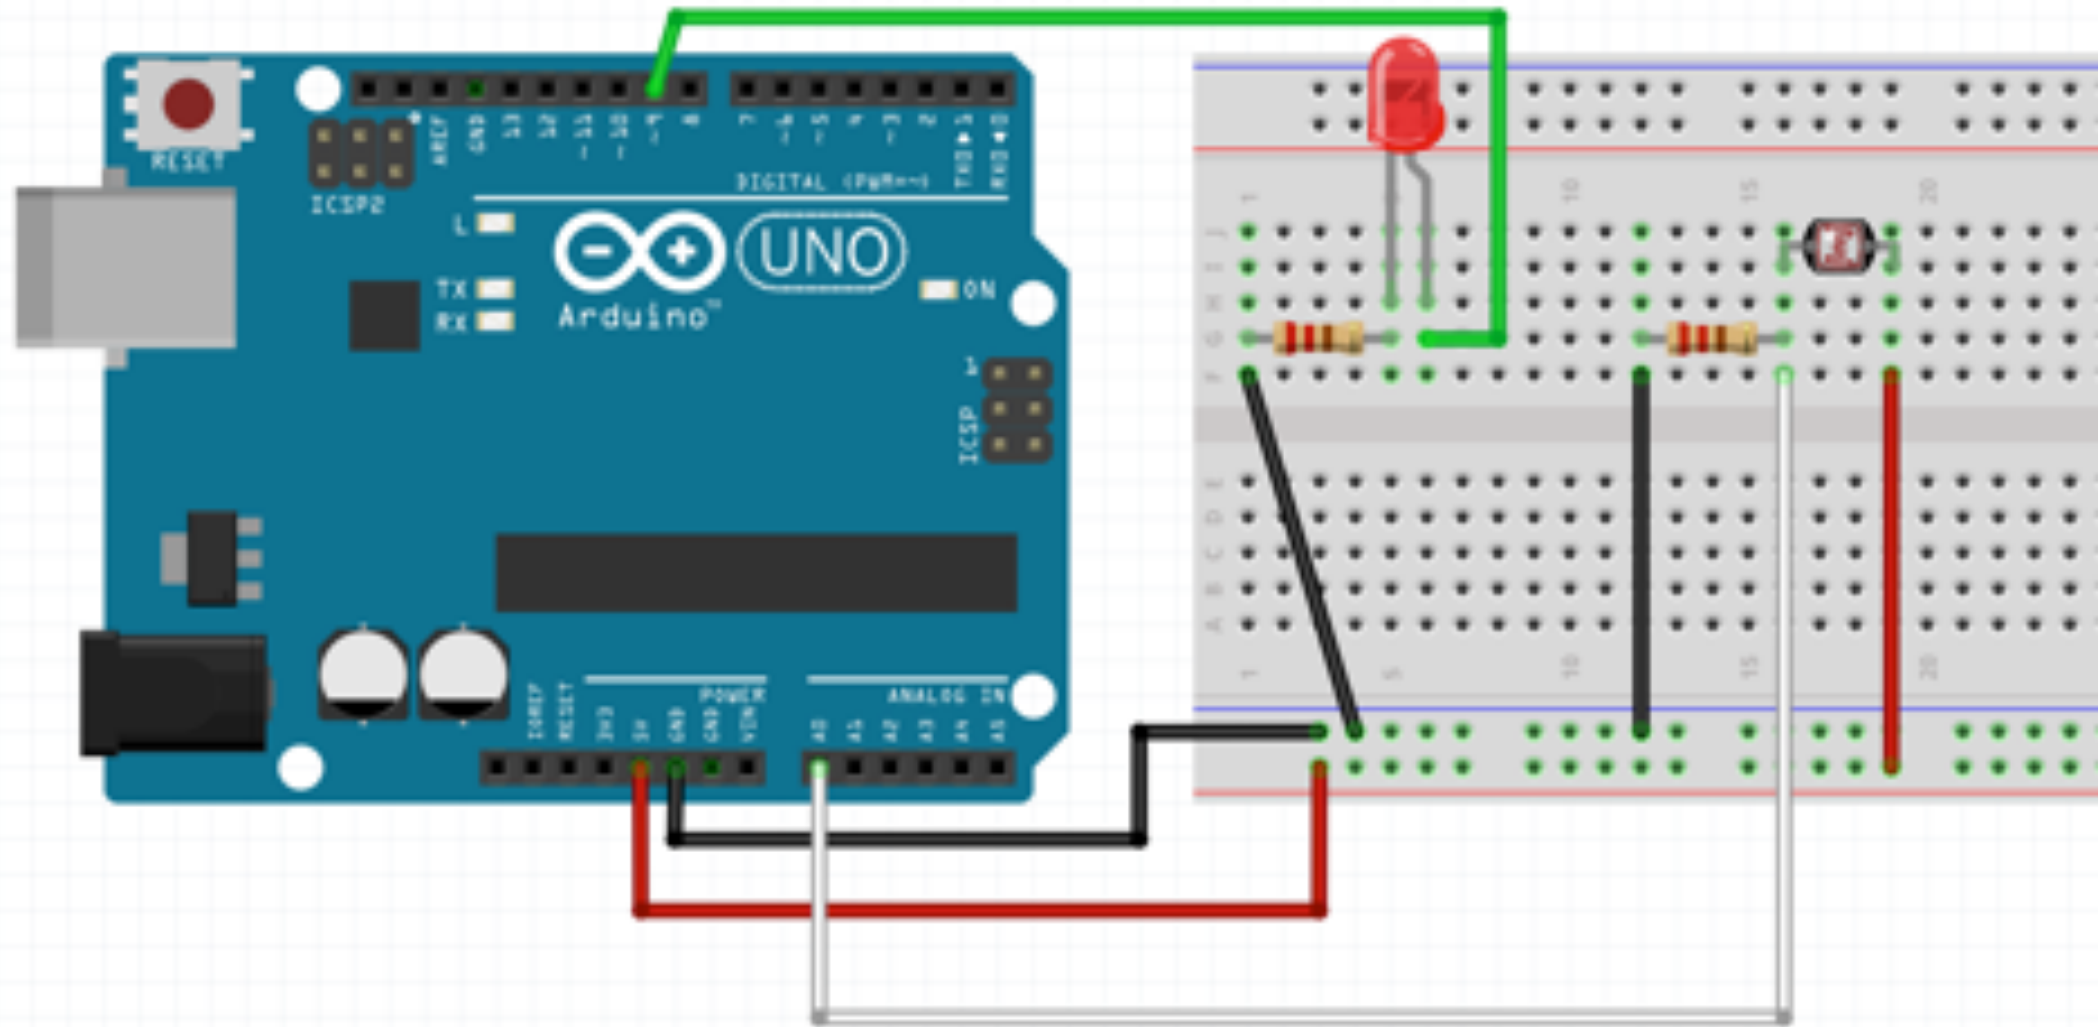

LEDS + INPUTS

RUN IT!

LEDS + INPUTS

LEDS + PHOTOCELL

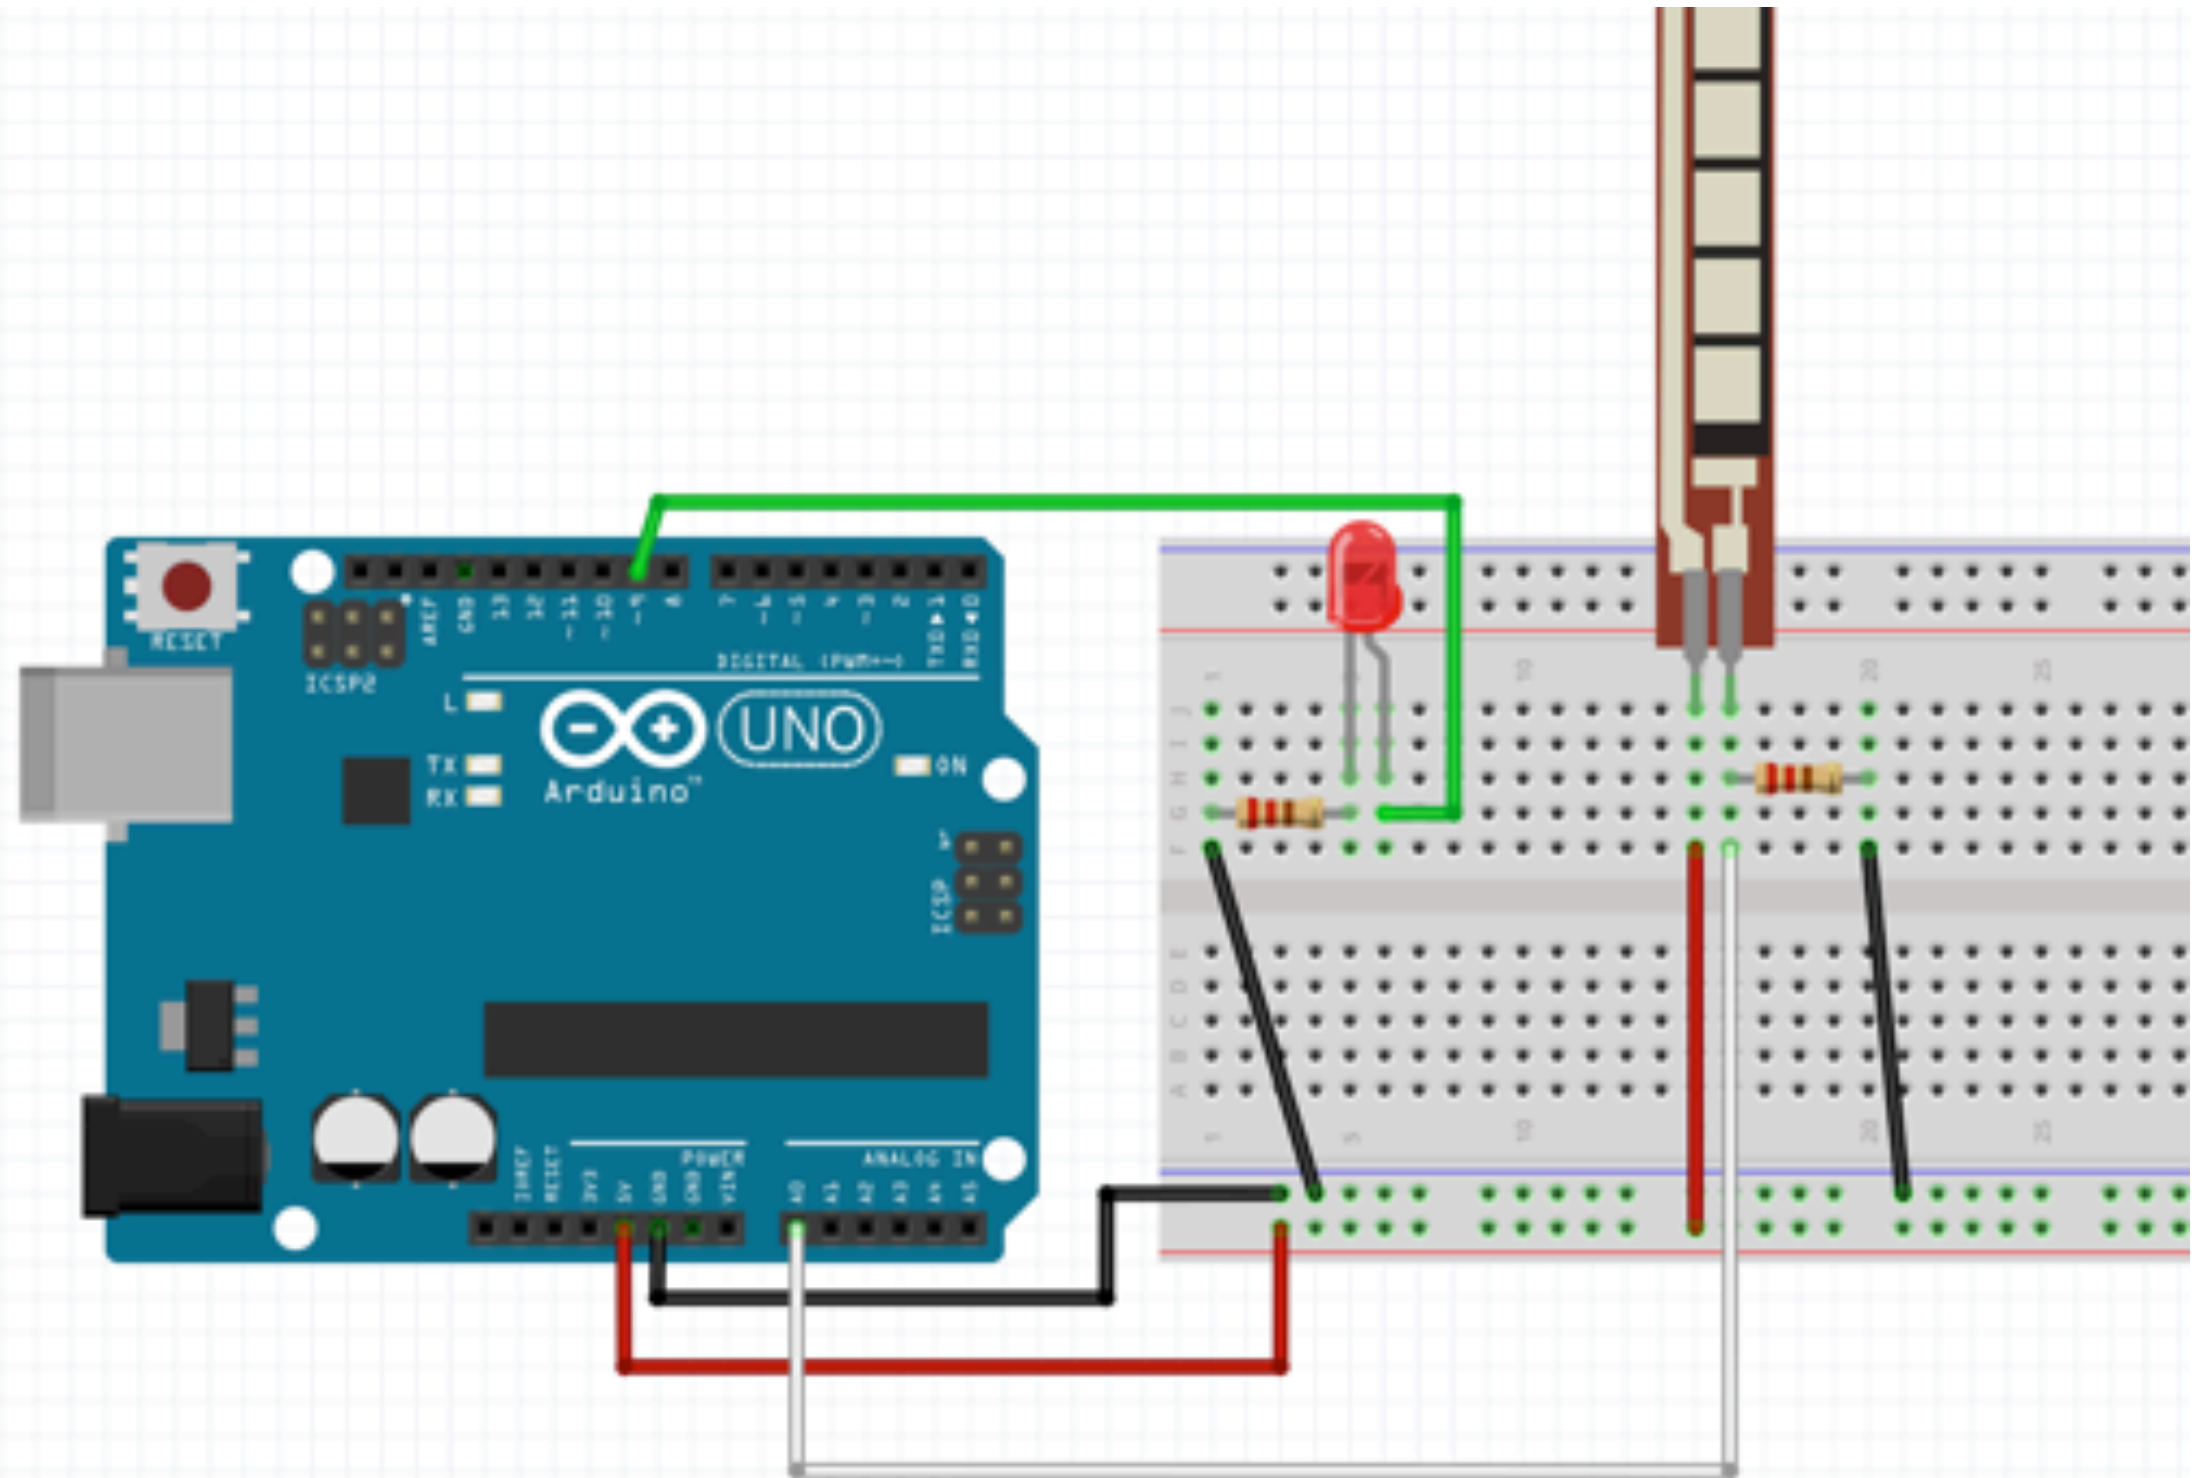

LEDS + INPUTS

```
int ledPin = 9;
int brightness = 0;
int sensorLow = 0;
int sensorHigh = 15;

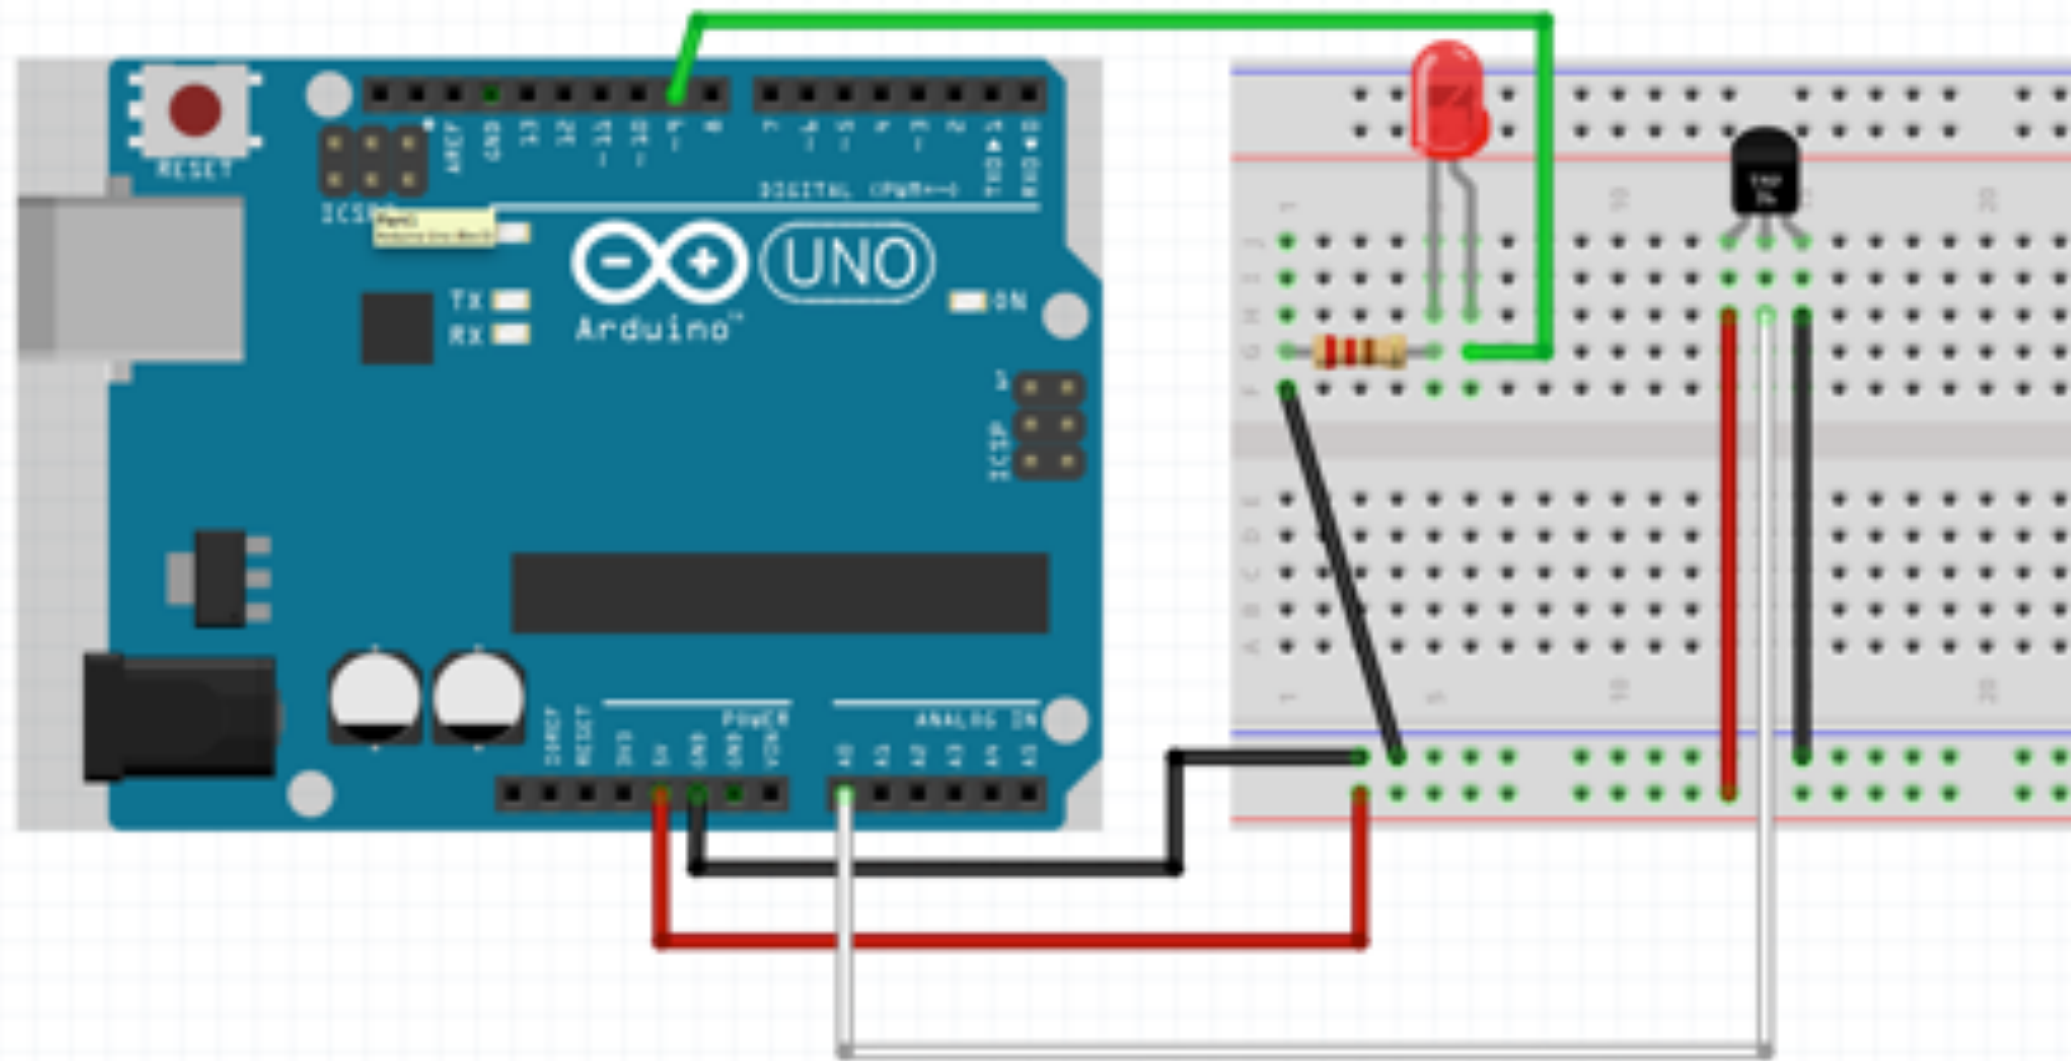

void setup() {
  // initialize serial communication at 9600 bits per second:
  Serial.begin(9600);
  //set up the pin as an output
  pinMode(ledPin, OUTPUT);
}

// the loop routine runs over and over again forever:
void loop() {
  // read the input on analog pin 0:
  int sensorValue = analogRead(A0);
  // print out the value you read:
  Serial.println(sensorValue);
  //make the value of the brightness be between 0 and 255
  brightness = map(sensorValue, sensorLow, sensorHigh, 0, 255);
  //set your pin brightness to the brightness value
  analogWrite(ledPin, brightness);
  delay(300);          // delay in between reads for stability
}
```

LEDS + FLEX SENSOR

LEDS + TEMPERATURE SENSOR

SOLDERING

Here's your
Homework

Homework

Get the class code up and running. Then, try it with a sensor we didn't cover in class. Take a five second video and push it to your git.

Homework

Take the project we
did in class today
and solder it.

NOTE: You can use any analog sensor you want.

Connecting an LED

Bring it to class.
(I want to see a demo!)
